

The Daily News.

NEWPORT,

BY CRANSTON & NORMAN,
127 THAMES STREET.

FRIDAY MORNING, NOV. 21, 1851.

TELEGRAPH TO SAN FRANCISCO.
Near the close of the last session of Congress a petition was sent to the Senate by a number of individuals, asking for \$300,000 to aid in constructing a line from New Orleans to San Francisco.—The project is to be renewed at the next session, and it is estimated that it will cost \$900,000, calculating for stations every twenty-five miles. The Company propose to do the Government telegraphing over the line for ten years for \$300,000, one eighth of which sum is to be paid as fast as one-eighth of the line is completed, under such vouchers for the due execution, on the part of the company, as Congress might deem sufficient.

ARCHBISHOP HUGHES A CARDINAL AT LAST.—A correspondent of *The Newark Advertiser*, writing from Rome, under the date of October 26th, announces that:

"Archbishop Hughes is to wear the scarlet cap, after all. His Grace has been made a Cardinal at last, in spite of all opposition. The important fact was made known, as I am well assured, to the 'congregation,' on Friday the 10th instant, so that the effect of his late visit to the Holy See has been under-estimated. The appointment is said to have been made, with what degree of truth I do not know, without the approbation, if not in fact of the express protest of all the Roman Catholic Bishops in the United States, save one, and contrary to the opinion of Chief Justice Taney.—However the fact may be, the statement is current here, and is generally believed."

"Catholic South America will probably feel slighted by this compliment to the Protestant North. But possibly the Archbishop may have convinced His Holiness and his advisers that the appointment is one of the ordained means of bringing about the promised 'good time coming,' when he is to write the 'History of the Decline and Fall of Protestantism in the United States.'—Let Dr. Murray look to his laurels—or rather to his resources!"

The announcement will be highly gratifying to those many friends of the prelate who were disappointed in the chance of the honor during his residence here a thousand years!

Littleberry Carrington, Esq., one of the Aldermen of the City of Richmond, Va., committed suicide by hanging himself on Friday morning. Upon his person was found a note, addressed to a friend, requesting that his body might be buried in the clothes upon them at the time of death, and that the coffin should be plain—"not to cost more than \$2, if one can be had at that price." On the back of this note was this Shakespearean superscription:

"The evil that men do lives after them;

"The good is oft interred with their bones."

The Richmond Times says that the immediate causes of the rash act are unknown. "Mr. Carrington was one of our oldest and most respectable citizens, having for many years been annually selected by the people of Jefferson Ward to represent them on the bench of the Hustings Court."

THE New York Express says that the cost of the "Holy Trinity Church," erected at the individual expense of E. J. Barstow, whose failure was announced the other day in Brooklyn, instead of being only 100,000 dollars, as we stated, was 200,000 dollars, occupying four years in the construction. The exterior is not, even now, completed.

The Boston Bee is responsible for the following:

Nothing was so much dreaded in our schoolboy days, as to be punished by sitting between two girls. Ah! the force of education. In after years we learned to submit to such things without shedding a tear.

Mr. Webster has granted to Mr. Brent, the Attorney General of Maryland, the right to appear as senior counsel in the Christiana treason trials, at Philadelphia.

Wm. B. Bigler, the Governor elect of Pennsylvania, and John Bigler, the present Governor of California, are brothers and both practical printers.

A meeting of the Whig State Committee will be held at the Counting Room of the Journal Office, tomorrow afternoon, at 3 o'clock.

A whale was taken off Bridgeman L. I., one day last week; and on the following day another whale was captured off Southampton. They yielded about thirty barrels of oil each.

MR. EDITOR:

I was happy to perceive by a notice in this morning's paper, that Rev. Mr. Stewart, Author of the "Free Mason's Manual," proposes giving the first of a course of lectures upon "Natural Science," on the evening of Thanksgiving day. To those persons who enjoy a personal acquaintance with the Rev. gentleman, it will be ample sufficient to call their attention to the above announcement, in order to secure their attendance throughout the entire course; and when it has been so generously proposed to bestow half of the entire proceeds, derived from this series of lectures upon the Poor of our town, I am confident that our citizens will show their appreciation of the proposition by generally attending the course,—and thus achieve the double advantage of enjoying a rich intellectual pleasure, while they are at the same time contributing towards the amelioration of the condition of a class of persons in our midst to whom the Lecturer has bestowed his active efforts and warmest sympathies.

AMIGO.

THE COUNSEL OF WOMAN.—Dr. Boardman, in his admirable work, "Hints on Domestic Happiness," inculcates this doctrine, which we cordially endorse:

"In a conversation I once held an eminent minister of our church, he made this fine observation: 'We will say nothing of the manner in which that sex usually conduct an argument; but the intuitive judgments of women are often more to be relied upon than the conclusions which we reach by an elaborate process of reasoning. No man that has an intelligent wife, or who is accustomed to the society of educated women, will dispute this.'

"Times without number you must have known them decide questions on the instant, and with unerring accuracy, which you had been poring over for hours, perhaps, with no other result than to find yourself getting deeper and deeper into the tangled maze of doubts and difficulties. It were hardly generous to allege that they achieve these feats less by reasoning than by a sort of sagacity which approximates to the sure instinct of the animal races; and yet there seems to be some ground for the remark of a witty French writer, that, when a man has toiled, step by step, up a flight of stairs, he will be sure to find a woman at the top; but she will not be apt to tell how she got there."

"How she got there, however, is of small consequence to us. And that they are very apt to be sound on the practical matters of domestic and secular life nothing but prejudice or self conceit can prevent us from acknowledging. The inference, therefore, is unavoidable, that the man who thinks it beneath his dignity to take counsel with an intelligent wife, stands in his own light, and betrays that lack of judgment which he tacitly attributes to her."

FROM MINNESOTA TERRITORY.—A correspondent of the St. Louis Republican, writing from St. Paul, Minn., as late as November 3, says:

Last night an express arrived at Fort Snelling, informing the commander of a war party of 400 Winnebagos, who were on their way down to visit the Sioux, to get them to join them to make war upon the Chippewas; alleging as a cause that the Chippewas had taken the scalp of one of the Winnebagos. This tale is believed to be an excuse to get back again into their old hunting grounds in Wisconsin and Iowa. The Winnebagos had sent their squaws and papooses down the river in canoes during the night, as we saw many of them on the banks of the river below.

The commander of Fort Snelling, on receiving the information, despatched a company of infantry, under Lieut. Col. T. L. Alexander, and a detachment of dragoons under Lieut. Magruder, to meet the Winnebagos war party and turn them back. These officers left Fort Snelling well provided with arms and ammunition to carry out the orders of the colonel.

Considerable snow fell last evening at this place, and the weather turned quite cold. St. Paul has improved a great deal since my visit last June. Many new buildings have been erected, and the population increased nearly double.

Every body seems pleased and satisfied with the place. Money is very scarce, consequently a great credit business is carried on, which in time will have a tendency to cramp many who now seem to be doing well.

The productions of the country are not adequate to the wants of the people, and I much doubt if they ever are able to supply the demand.

The cranberry crop is very light and selling by the barrel at \$6. I wanted to buy 500 barrels at \$5.50 and could not get any, though some had been sold before at \$4.50. I perceive they are a ready sale at Galena and lower down the river at \$6.50 and \$7 per barrel.

The people of this country are looking for an early winter and long one. I presume no boats will be able to reach St. Paul after the 15th of the present month.

The removals from office in the territory seem to be very satisfactory, and the new appointments (so far as known) are thought to be good.

The newspaper.—The great general of the people, who has driven the enemy from the fortified heights of power, and compelled him to give battle in the open field of thought.

The removals from office in the territory seem to be very satisfactory, and the new appointments (so far as known) are thought to be good.

7 days later from Europe.

NEW YORK, Wednesday, Nov. 19th.

The Royal mail steamship Africa arrived about 2-1/2 o'clock this afternoon, having left Liverpool at noon on the 8th inst. She brings 101 passengers, and one week later intelligence.

ENGLAND.—The Workingmen of London joined in a demonstration in honor of Kossuth, on the 3d inst. They formed a monster procession, and marched with music, &c., to the place appointed, to the number of about 60,000. An address was presented to Kossuth, from the inhabitants of London, to which he read a written reply, thanking the assembly for the honor they had done him.

Kossuth had exchanged visits with Mr. Folsom, Minister of the U. S. at the Hague, at present in London, at one of which Mr. Rhett, of S. C., and others were present.

FRANCE.—M. Corbin has declined the appointment of Minister of Justice, and M. David appointed in his place.

The National Assembly renewed its sittings on the 4th, when M. Dupin was re-elected President.

Louis Napoleon's message is very voluminous and conciliatory. It commences by professions of a desire to preserve the institutions of the country against Democracy, and gives an account of each Ministerial Department, and of the favorable concessions of railways to Companies.

CAPE OF GOOD HOPE.—Advices from the Cape to Oct. 1st, had been received. The news from the frontier continues of a very alarming and unsatisfactory character. Capt. Oldham and many men of the Queen's regiment, had been killed, and the seventy-fourth have also lost a number of men.

BELGIUM.—The Belgian Chambers were opened by a speech from the King on the 4th. His Majesty spoke assuringly of the country in all its departments.

Advices from Hanover, state that the accounts of the King's health continued to be very unfavorable.

SPAIN.—The Madrid papers announce that several commercial houses of the South of Spain had united to fit out at their own expense two steamers to protect merchantmen against the attacks of the Moors.

ARRIVAL OF THE GEORGIA.

The U. S. Mail Steamship Georgia arrived at N. Y., between 2 and 3 o'clock Wednesday morning, with the California mails, and a large number of passengers. She brings \$1,420,650 in gold dust on freight, and about \$300,000 from California has been anticipated.

The Georgia met Havanna the steamer Illinois and took her mails and passengers, she having met with an accident to her machinery; also met the Philadelphia, and took her passengers. The latter ship had also 400 passengers for New Orleans.

The California had arrived at Panama, with 270 passengers, and the New Orleans with 300.

A number of passengers came by the Georgia, who travelled the Nicaragua route, but could not obtain passage in the other line, most of them were fourteen days crossing over, and experienced many hardships, about 200 still remain there.

LATER FROM HAVANA.

The Georgia brings intelligence from Havana to the 14th inst. Mr. Thrasher had been tried and found guilty of treason, and sentenced to the chain gang eight years, and would be sent to Spain. He is in good spirits, and anticipates a reversal of his sentence.

Mr. Owen, the American Consul, was present during the trial, and has been using his endeavors to obtain from the Captain General Mr. Thrasher's release without effect. Everything was quiet at Havana. There was no American man-of-war there when the Georgia left.

NAVAL.—A correspondent of the Philadelphia Sun, writing on board the U. S. Brigate Susquehanna, at Rio, on the 23d Sept., says:

Commodore John Auflick has detached Captain Irwin from this vessel, and ordered him home; he has obeyed this arbitrary order and returns by the vessel which conveys this to you. I hope that he will receive ample satisfaction for that which every one considers a most gross insult.

The Susquehanna was to sail in a day or two for the East Indies.

LOLA MONTEZ.—This extraordinary woman, after dancing in Paris for a week, will sail from Havre, in the Humboldt, for New York, on the 22d of this month.

THE NEWSPAPER.—The great general of the people, who has driven the enemy from the fortified heights of power, and compelled him to give battle in the open field of thought.

MARRIED.

On the 4th inst., at Bowling Green, Ky., by Rev. Mr. Jones, Light Underwood, daughter of Hon. J. R. Underwood, and Arthur Middleton Rutledge, of Nashville, Tenn.

DIED.

In Portsmouth, Wednesday, Mr. Job Lawton, in the 91st year of his age.

The funeral of Mrs. Anna King will take place from the residence of her son, Edward King, tomorrow, at 11, A. M. The friends of the family are invited to attend, without further notice.

FRENCH LANGUAGE.

M. LUCIEN OUDIN, a native of Paris, and a graduate of the University of France, has the honor of informing Friends and Friends of Newport, that on the 13th of October he will commence giving lessons in the French language, either at private houses, or at his residence, No. 17 Fair Street.

Mr. L. OUDIN was engaged, in Paris, by the Rev. Dr. Chodat, for the purpose of teaching French in his School. That situation enables him to put his terms at a quite reasonable rate—Besides, his resolution of making Newport his home is a guarantee of permanence in his lessons.

He will be happy to call immediately on any person who may address a line through the post office, to

LUCIEN OUDIN,
French Teacher.

REFERENCES.—Rev. Dr. Chodat, Dr. Dunn, Miss P. Gouraud, French Vice Consul, &c., &c.

REAL ESTATE AT AUCTION.

BY virtue of a Mortgage Deed and a Power of Attorney thereon executed, made and executed by E. Henry Brown, late of the town and county of Newport, deceased; to Daniel T. Swett, trustee of said Newport, bearing date the 13th of January, 1849, and by said Swett assigned to the subscriber on the 13th day of October, 1851.

I will sell at Public Auction, on the premises, in said Newport, on the 26th day of December, at 11 o'clock, A. M., all the right title and interest conveyed by the said E. Henry Brown, in and to one undivided half part of a certain piece or parcel of land, and the buildings thereon standing, situated in said town of Newport, bounded Westerly on Thames street, 15 feet 7 inches; Northwesterly partly on land of Benjamin H. Tiddie, and partly on land late of May Penrose, deceased, 235 feet 9 inches; Extent on land now or late of the heirs of Daniel Brown, 40 feet; and Southerly partly on Frank Lane, and partly on said land now or late of the heirs of Daniel Brown, 227 feet 7 inches,—including an Alley way of six feet wide, leading from Frank Lane to the house in the rear of the shop,—which said Alley way is at all times to be kept open, to pass and repass to said from said house,—be said measurements more or less, or however otherwise the same may be bounded. Condition at the time and place of sale.

ROBERT R. GARR,
Mortgagee.

n13 ts
SHELTERS, Almonds, Peacock Nuts and Dates on hand and for sale by

A CARD.

DOCT. F. GOUAUD,
Medical Doctor, a graduate of the Academy of
Medicine and Surgery of Paris, France.

STURGEON OCULIST, DENTIST,

AND PROFESSOR OF CHEMISTRY;
has the honor to apprise the Ladies and Gentlemen of Newport and vicinity; and, in general his old acquaintance and former patients, for this sixteen years past; that he has begun again his former practice of Medicine and Surgery, at his Dwelling, No. 19 Bridge Street; where he offers his professional services to them, as a Surgeon Dentist and Oculist; his long experience and extensive warranties, given to those who place confidence in his skill, dexterity and performances in giving general satisfaction, will have the merit to assure an enlightened public that their patronage will not be lost with, under regard to their dental, either for themselves or their children in regulating the defects of their teeth in the different operations performed in the art of Dentistry upon them.

As a Surgeon Oculist, in the varieties of diseases either chronic, inflammatory or accidental, which afflict the Eyes and the SIGHT, either young subjects or older ones; the Doctor during his two sojourns in the city of Paris, has by deep scientific and laborious studies, rendered himself amply acquainted with them, principally with those concerning the operations performed on STRABIC SUBJECTS, or Squint Eyes.

This delicate operation which gives immediate relief to an awkward and disagreeable deformity of nature, performed by a skilful operator, is reduced to about 30 seconds, or, to the furthest, to one minute's anxiety; and, no other hurt or sensation than the feeling of a tiny touch entering under the Eyelid, or the prick of a fine canopic linen needle, intended in the flesh; as an evidence, the only sight or inspection of the instruments used in performing the operation, will be all sufficient to induce a Strabite, without any hesitation to desire the immediate performance of the operation.

It is necessary here to state, that in 1811, the Doctor was the first practitioner who introduced and performed the operation of strabismus, in the city of New York, upon 24 Strabite subjects, with an indisputable success, after having operated upon upwards of 350 in France, June 21.

F. GOUAUD.

Professor Alexander C. Barry's

Tricopherous, or Medicated Compound, for restoring, preserving, and beautifying hair; eradicating scurf and dandruff, and curing disease of the skin, glands and muscles, sciatica, cuts, bruises, sprains, &c., &c.

In order to convince the public of the efficacy of any curative preparation, in this striking and reflective age, it is necessary to explain the philosophy of its operation.

The process by which Professor Barry's Tricopherous produces such extraordinary results, cannot be understood, without a brief notice of the structure and uses of the delicate substances to which it is applied, and in the condition of which it accomplishes the most salutary change.

The connection between the hair and the skin is so close, that the one may almost be deemed a continuation of the other; and hence whatever recreates, restores, and nourishes the hair, must of necessity have a beneficial influence upon the sensitive membrane in which its roots are fixed.

The skin, that wonderful envelope, in which the sense of touch resides, consists of three layers; the epidermis, or cuticle, a semi-transparent, or almost imperceptible film; the next membrane, which is a spongy membrane, reticulated with nerves and blood vessels, and forms a sort of shield to the exquisitely sensitive true skin; and the true skin itself, which constitutes the third layer of the triple envelope.

In this tough, flexible, and elastic integument, are located the nerves, blood-vessels, &c., which supply sustenance to the hair, and in the arrangement of which disease of the skin originates.

The vessels of the true skin supply the pores, which sustain the hair, and the same moisture which sustains the fetus, and the same causes which affect the health of the hair, also affect the health of the skin.

It acts through the skin upon the hair, stimulating the inert vessels, opening the pores, imparting activity to the circulation, awakening from their torpor all the reproductive functions which give life, vigor, and beauty to the plant, extinguishing every particle of scurf and dandruff, and soon clothing even the bald or half-dead head with a thick, glossy, silky, and satiny covering.

But this is only one of the uses of Professor Barry's Tricopherous. The same properties which restore vital and vegetative power to the skin of the head, are equally beneficial in all cutaneous diseases or superficial injuries.

For cuts, burns, bites of insects, sprains, erysipelas, blisters, pimples, scabies, ringworm, rashes, scrofula, pustular, chilblains, clapped hands, plurimonia, burns, scalds, bruises, redness of the skin, an itchy skin, all the troublesome and painful external diseases and injuries which are common in families, and which nothing but external remedies can remove; the Tricopherous will be found a speedy, safe and fulfilling cure.

By virtue of its double office as a restorer and beautifier of nature's delicate instrument, and a pot and invaluable remedy against it, is entitled to a place on every toilet and in every medicine chest.

Sold in large bottles, price 25 cents, at the principal office, 137 Broadway, N. Y., and by the principal merchants and druggists throughout the United States and R. J. TAYLOR, Newport, and J. BALCH & SON, Providence.

PHALON'S CHEMICAL HAIR INVIGORATOR.

THE enormous progressive increase in the sale of this unrivaled article for renewing, invigorating and perpetuating the growth of the hair, is a proof the common sense and experience of a sagacious public will ensure the triumph of a genuine preparation, which sustains by its results the inventor's guarantee over all spurious nostrums, however they may be baited by false pretenses, or propounded by unscientific statements.

Also, the quality of iron and the care and skill with which they are executed, Al. so, notice the top which is so constructed as to prevent the least possible chance of breaking or burning out.

2d. The form of the fire chamber—a cylinder lined with soap-stone, or fire-brick, and known to be the best form of fire-chamber in which to burn coal.

3d. Notice the front of the range closer tight, with a register in the ash-door, to give draft, which when closed makes the range perfectly air-tight. Also, a new arrangement for dropping the grate from the outside, so that no dust can escape in the room.

4th. The simplicity of the arrangement; it having but one flapper, which manages the whole. Also, the convenience for cleaning the flues, and a convenient place to put the coal ash, and a very large oven, of capacity enough to take twelve pigs. Also, a bath boiler, which can be heated by a side or back fire, &c., a water tank, and a new and improved boiler fixture which will heat a room from 12 to fifteen feet square, with the same fire that is used in cooking. There are five sizes of these ranges, all of them can be set with double ovens either No. 1, 2, 3 or 4, at the option of the purchaser.

TO PHYSICIANS

AND THE AFFLICTED!

RECEIVED this day a new supply of GOLD-berger's GALVANIC ELECTRIC CIRCUITS, which are recommended by all the first Physicians in Europe, as the certain remedy against Rheumatism and Nervous Complaints; what our eminent Physicians, Dr. Wm. Wesselhoeft, Dr. G. F. Hoffmann, Dr. John Birns, Dr. John Ekel, in Boston; Dr. Vandenberg, in New York; Dr. McManus, Bullock, etc., have proved by trying them.

More than 1000 true testimonials may be read in the different languages at the Agent's, from the first Physician.

All afflicted with such complaints, are respectfully invited to call and examine the true testimonials and documents, which are confirmed by the Government of Berlin; I recommend these Circuits to all afflicted, as these are daily new and extraordinary cures effected by them.

C. F. RITCHIE, M. D., General Agent.

Boston, August 6, 1851.

C. G. C. HAZARD, Sole Agent in Newport.

ai

jl2.

BLISS' JENNY LIND HOT AIR COOKING RANGE.

IN presenting this Range to the public, the subscriber would call attention to its merits. He has been well convinced from his own observations that the public are in want of a Range with such improvements as will render it more perfect for all purposes of domestic utility and economy, than any now in the market. In the article which he now offers to the public for examination, he has (if he can place any reliance upon the assurance of experienced dealers in Houses and Stores, &c.) the stock is fresh, well assort'd, and cannot fail to give satisfaction. He would say to
